ABOUT OUR COMPANY

Sorensen Design & Construction, Inc., founded by Wes Sorensen in 2011 is a general contracting company that specializes in design and construction. Growing annually year after year, our team has successfully designed and constructed hundreds of projects while serving Utah and Arizona.

Sorensen serves as a single contact between the owner and the design-build team, transforming the relationship between designers and builders to form an alliance that fosters collaboration and teamwork. Utilizing this construction method Sorensen holds single-source responsibility and contractual risk for every aspect of a project from estimation and pre-construction to architecture, engineering, subcontracting, construction and post-construction. As design-build experts on a project, Sorensen manages all contacts with companies and vendors, such as subcontractors, equipment vendors and materials providers. In addition, an integrated design-build team helps owners save time and money through value engineering, while completing projects faster, improving project quality, and lowering unit costs.

Our goal is to partner with firms like yours to bring creative designs into reality with a focus on precision, communication, and a long-term relationship.

**FOUNDED ON INTEGRITY,
BUILT WITH QUALITY**
